Welcome to

The University of La Verne Athens
New Campus Project

A 28-year-old vision of a traditional university campus on its way to being realized!

We’re on our way...

NEW ADDRESS: Ellis 3, Halandri, Athens 15233 (From Ag. Paraskevis 114)
Turning a page in history...

We are proud to announce that the University of La Verne Athens has acquired a new campus and will be moving to its own home this year!

For many years, we have dreamed of a ULV Athens campus. For nearly 30 years, the University has offered its students a rigorous academic program taught by a first-class faculty in a rather challenging physical environment—in rented buildings scattered throughout Kifissia. To find a suitable location and to finance such a venture have been primary goals.

As of September 2003, our University will be situated in Halandri, on an 11,000 square meter property near Plateia Kennedy, strategically located near the Attiki Odos and the Metro. Unified in a single location, student life will blossom. The size of the property will allow us to expand and add facilities in the future, thus constituting a permanent home that will secure the future of the University of La Verne Athens for years to come.

Students will enjoy a large cafeteria, a student lounge, spacious classrooms, sports facilities, easy access to the library, computer lab, writing center, and bookstore.

In the future, a metro station will open within 150 meters of our entrance. In the meantime, a shuttle bus will run between the nearest metro station and the campus. By car, the Plakendias exit of the new Attiki Odos is one kilometer from the site; and in a few years, the city plan shows that a main road will connect Messogeion Avenue with Plakendias, running just beside our property. Ample parking space will be available.

Our vision of a traditional university campus, magnificent in its landscaping and loaded with facilities is becoming a reality! With the support and financial gifts of our community of friends, alumni, and parents, we will renovate and build a campus worthy of our academic reputation.

Thank you for your support of the University of La Verne.

Sincerely,

Craig

President
